## Wireless Indoor Air Quality Monitor

Synetica's enLink Air is a wireless, indoor air quality monitor for real-time, continuous measurement of air pollutants.

Designed and manufactured in the UK, the enLink Air allows the easy visualization and analysis of key environmental parameters including temperature, relative humidity, oxygen, carbon dioxide, carbon monoxide, VOC's, ozone, particulate matter, light level plus many more.

Using the latest gas sensing technology, the enLink Air provides excellent accuracy and extended instrument longevity. Incorporating long range LoRa™ wireless, the enLink Air Indoor Air Quality Monitor can transmit data for up to 16km with building, interior penetration of 1-2 km without repeaters.
